Deakin 2030: Ideas to Impact

We deliver impact locally and globally

Great universities build bridges; they strive for connection and broaden their understanding of diverse peoples and places.

Our societal contract with Australia extends to our ability to teach, learn from and collaborate with the best minds in the world.

By connecting with diverse people and places, we embrace and learn from our similarities and differences. We will teach, learn and collaborate with the best minds in the world.

We will sustain our networks and build new ones to remain an internationally connected university.
